

Neurological Institute Opened Doors Thursday

Many Notables Present — Chancellor Presides — New Institution Not To Be A Burden Financially To McGill — Dr. Harvey Cushing Delivers First Lecture — Long Training Necessary — Building Impressive Both Within And Without.

THE dream of a Canadian centre for the study of neurology and neurosurgery at McGill University became a reality last Thursday afternoon when Chancellor E. W. Beatty, K.C., formerly declared the Montreal Neurological Institute open, in the presence of a distinguished assembly of medical men and citizens, representative of Great Britain, Canada and the United States. Outstanding as the occasion was, Montreal as well as the University will enjoy an increased measure of prestige by reason of the facilities now available for research in this vitally important branch of medicine.

In his inaugural remarks, the Chancellor expressed gratitude to the Rockefeller Foundation, Sir Herbert Hoit, J. W. McConnell, Walter Stewart and four anonymous donors as well as to the province of Quebec and the city of Montreal whose generosity had made possible the erection of the Institute. To Dr. Penfield, the moving spirit behind the undertaking, and his staff he expressed his good wishes and the hope that it would prove its worth and reflect credit upon the University. The status of "Nature unvelled herself before science" done in beautiful Carrara marble by A. Galli, being a replica of the original by Barrias in the Louvre and a gift of Mr. and Mrs. A. A. Hodgson and Dr. and Mrs. Lewis L. Reford, was then unveiled by Mayor Houde.

Dean Martin Speaks
After this ceremony adjournment was made to the second floor ward where the main part of the program took place. In the capacity of chairman, Dr. C. F. Martin, Dean of the Faculty of Medicine, made reference to the late Sir Arthur Currie who had laid the corner-stone of the edifice scarcely a year ago. Dean Martin spoke appraisingly of Dr. Penfield's unusual ability and high skill and drew attention to the large number of out of town guests as significant of the Institute's importance. He then called upon Dr. Edward Archibald to deliver the foreword.

Declaring that few subjects in medicine require as great an intellectual capacity and as arduous a labor as the study of the nervous system, the head of the department of Surgery went on to say that the application of knowledge acquired by research is the loveliest occupation of the physician. The confidence of the Rockefeller Foundation in Dr. Penfield made possible the building of one of the finest and best-equipped institutes of its kind in the world. It marked, he said in conclusion, the beginning of a new stage in neurology and "we wish the workers godspeed on their way."

David Not Present
The Hon. Athanasius David, Provincial Minister of Public Health, who was to have spoken on Neurology and Public Health was unavoidably prevented from attending, so his address was deleted and Dr. Wilder Penfield after a warm introduction was asked to speak of the significance of the Neurological Institute. Mention was made first of the words of the late Principal at the laying of the corner-stone last autumn when Sir Arthur expressed the hope that through the facilities to be provided, those suffering from the most misunderstood of human afflictions might be aided. So shortly after, had this misunderstanding rendered them helpless when McGill's Principal was stricken. Dr. Penfield declared that the task to which the Institute was dedicated in all humbleness of spirit was "the better understanding of the ills to which the nervous system is heir to the end that we may come to the bedside with healing in our hands."

The first Foundation Lecture was (Continued on page 7)

FORMER REPORTERS

All former reporters of the Daily who intend to continue their work this session are requested to register at noon today or tonight at the Daily office in order to be sure of obtaining a position on the night they desire. Due to the fact that the Daily staff has increased so greatly during the past two or three years it has become necessary to restrict the number of reporters therefore only a limited number will be allotted to each night. Anyone wishing to join the staff after this allotment has been made will have to place their name on a waiting list until a vacancy occurs. Former reporters will, of course, be given preference if a prompt registration is made otherwise freshman reporters will be taken in to fill all vacancies. Registration may be made between the hours of twelve and one-thirty, between five and six, or anytime after seven-thirty in the Daily office.

Greets Students

E. W. BEATTY, Chancellor, whose message to the student body will be found elsewhere on this page. He has recently returned from a tour of the West.

Many Publications Penned By Staff Members In Year

Scientific And Medical Subjects Most Popular

FOUR hundred and twelve publications on scientific, medical, agricultural, arts, engineering, law and musical subjects were penned by members of the McGill staff during last session. Publications on scientific subjects lead the list with a total of 152 the largest number being on chemistry and biochemistry, while the medical department turned out the second largest number of 130 for the session. Agricultural and arts publications are also high with Animal Nutrition and Breeding, and Economics being popular subjects.

Classification by divisions is as follows:

Accountants Hear Ferguson
Under the auspices of the General Accountants Association Professor W. A. Ferguson will give the first lecture of the 1934-35 season speaking on the revised Dominion Companies Act. It will be held tonight at eight p.m. in the Biological Building.

Principal Not Yet Selected

E. W. Beatty Gives Annual Message To Students

TRADITIONAL ADDRESS States Fundamentals That Should Be Adhered To

AS the undergraduates know, the Governors of the University have spent many months in considering the availability and fitness of several educationists for the vacant position of Principal and Vice-Chancellor. While a great deal of progress can be reported and much essential information has been secured, no selection has yet been made. It is our hope, however, that an announcement will be possible before the end of the present calendar year.

The selection of the Dean of Arts to succeed the late Doctor Ira H. Mackay, has not been made. The position is being very acceptably filled by Professor Woodhead as Acting Dean, and a permanent appointment will be made at the next meeting of the Board of Governors.

The late Sir Arthur Currie was accustomed to send a message to the undergraduates, particularly those just entering the University, on the occasion of the publication of the first issue of the McGill Daily. Your editor has been kind enough to suggest that I might give a similar message this year, and I am very glad to comply with this request though I appreciate there is little that can be added to Sir Arthur's messages, except in the form in which it is given.

Undergraduates Enjoy Advantages

University undergraduates enjoy exceptional advantages even over the students of my generation, but the fundamentals remain the same. The life of a university undergraduate should be one of serious pursuit of knowledge for its own sake; that in the four or more years he spends at college he should improve his knowledge and precision in thinking. This does not mean that he should cease to live and my earnest advice is that each student should live to the full his years in college, make friends, indulge in athletics and, above all, interest himself in undergraduate activities. In no other way can he realize the full advantages of his years at the university and in no other way can he get a perspective which will be of such vital importance to him when he graduates.

If we are moving to improve economic and social conditions, our wisdom in planning and executing policies which will accelerate and make permanent that improvement will determine to a large extent the future of Canada. It is of great importance that the undergraduates of McGill should fit themselves to make their contribution later to the solution of this country's economic and social problems, and if I were to indicate (Continued on page 8)

Student Busses To Follow Boat Race

McGill Meets Blue Crew On Lachine Canal On Saturday

The Annual Boat Race between the Blue and White crew of Toronto Varsity and the Red and White of Old McGill has been scheduled for Saturday afternoon, October 6th. Arrangements have been made to accommodate the crowd of spectators that witnesses this annual struggle. The race will be held on Lachine Canal, and busses will follow the crews along the south shore. The road on the north shore of the canal will be closed to all traffic and an admission will be charged those wishing to view the race from this point in the parking space thus provided.

The busses will number ten, and will assemble at the McGill Campus at 2 o'clock on Saturday, and students intending to see the race in this manner are advised that the busses will leave the campus for the race at 2.30 punctually. Some of the campus fraternities will hold a competition for the decoration of the busses in the usual manner with the McGill Colours. Reservations are coming in steadily, and four busses have already been sold, the committee reports. A large group of spectators and McGill rowers is expected.

Tickets for the race may be had from Paul Chevalier, Louis Johnson or Bruce Fallows now, and will go on sale at the Ticket Office in the McGill Union tomorrow. The price has been set at \$1.00, and students wishing to see the race are advised to reserve as soon as possible. The race will com-

Colonel W. Bovey Recipient Of First Prize In Contest

For his monumental and very comprehensive work, "Canadian," Colonel Wilfrid Bovey, director of the Department of Extra Mural Relations at McGill University, has been awarded the first prize in the David Literary Contest. The Provincial Secretary has announced that the Colonel will be the recipient of the coveted \$600.00 prize.

The contest is divided into an English and a French section, Colonel Bovey winning the prize in the English section. In the French section of the contest the first prize of \$1700.00 was divided equally between Mrs. M. C. Davelluy, authoress of "Jeanne Manne," and Georges Langlois, a Montreal journalist, author of "Histoire de la Population Canadienne-Francaise."

Various Lectures Delivered Extra- Murally By Staff

University Studies Discussed In 506 Lectures

FIVE HUNDRED AND SIX lectures were delivered in the United States, Canada and Europe during the past year by members of the University staff. By means of these lectures on medical, scientific and all University studies members of the University staff are able to make known to the public the results of their work and study and come constantly in touch with the world outside the University walls.

The larger number of the lectures were naturally delivered in the Montreal community but many of the medical and scientific lectures were given in Europe as well as in various centers on this continent.

Appointed Secretary

Fred Stone Becomes Identified With Alberta Political Party

News was received at the University this summer of the appointment of Fred V. Stone as Secretary to Premier R. E. Reid of the United-Farm Party, Alberta. At the time of the announcement Fred Stone was doing post-graduate work in the department of Economics under Professor Marsh working for his Ph.D. degree on a phase of Unemployment.

In 1927 Mr. Stone started his studies in the faculty of Arts receiving his B.A. degree in 1931 with first class honors in economics and political science, though he spent his Junior year as exchange student at the University of British Columbia. In 1932 Fred Stone received his Masters' degree in Arts.

His chief claim to fame lies in his reputation as a public speaker representing McGill for several years in international debates.

McGill Senior Football Squad Defeats Cadets

Wins 14-6 In Smart Exhibition — New Players Star — Smith And Ruschin Lead Attack — Letourneau Plays Well On Defence — Kicking Weakest Department Of Red Team — McBrien Outstanding For R.M.C. — McGill Line Feature Of Game.

Union Rehabilitated In Summer Months

Athletic Manager Provided With Better Facilities

FRESHMAN RALLY SOON

During the vacation while most of the college buildings were closed the Union was the scene of unusual activity for every day a horde of carpenters, painters and plasterers to say nothing of plumbers and electricians made their way to 690 Sherbrooke St. West.

The reason? One of the first contracts let was for a new office for Major Forbes, the Athletic Manager. This new office is on the second floor at the back of the ping pong room. This improvement will give more space to the already crowded Athletic Office. The next, and perhaps the most important renovation was made in the washroom in the basement. Old timers returning for another year at McGill will not recognize this part of the Union. No efforts were spared to make this room presentable—even the floor was retiled.

New Equipment

Upsairs the reading room was thoroughly cleaned and a new surface put on the hardwood floor. It is hoped by the Union House Committee to hold several dances in the reading room this winter as it has a delightfully cosy atmosphere, the fireplaces at the ends of the room lend a homelike atmosphere to the functions. The cafeteria has also had its floor revarnished.

Coming Program

While great attention has been paid to the equipment of the Union, the House Committee has not forgotten that a new season is here and a wide programme has been drawn up. This will include as its first event the Freshman Pep Rally on the evening of Wednesday, October 3rd. At this rally the freshmen will hear Mr. George S. Currie, a Governor of the University, who will say a few words of welcome. Other speakers will be the captains of the various teams, the President of the Students' Society and the President of the Union. It is expected that the President of the Scarlet Key Society, and the Editor-in-Chief of the "Daily" will also be present. (Continued on page 8)

Memorial Erected

Portrait Of Late Principal Hung In Arts Building

The life size portrait of the late principal and vice-chancellor of McGill which graces the main hall of the Arts Building is the first memorial to Sir Arthur Currie at McGill University. The portrait, which represents the late Sir Arthur Currie seated at the principal's office in the East Wing of the Arts Building is the donation of last spring's graduating class in the Faculty of Arts. Arrangements for its hanging were made by Malcolm Ramsay, president of the class, and a committee of representatives.

The portrait is framed to harmonize with its surroundings and later a bronze plaque, suitably inscribed will be placed in position beneath it.

CALL FOR NEW REPORTERS

Positions on the reporting staff of the McGill Daily are now open to all men and women undergraduates of McGill University.

Applicants should see one of the members of the Managing Board, in the Daily Office, which is situated in the basement of the Union, 690 Sherbrooke St. West, between the hours of twelve and one-thirty, five and six, or any evening.

The Daily offers elementary experience in practical journalism. Each man or woman is assigned to one day of his or her choice each week. Duties are arranged so as not to interfere with studies.

The Daily will be found an excellent introduction to college life, as every happening has its echo in the Daily office. The work is not very difficult, and the surroundings are congenial. Advancement is made according to merit.

All freshmen, freshettes, and any friends they have at college who are interested in the Daily are cordially invited and are promised a hearty welcome.

McGILL'S football prospects looked bright today as a result of the decisive fourteen to six victory scored by the big red team Saturday, in its annual clash with the soldiers from the Royal Military College at Kingston.

Led by Joe Smith, the new forward passing ace from California, McGill outplayed the R.M.C. squad in every department of the game but the kicking, where McBrien and Whittaker more than held their own with Craig, Riddell and Richert, who did the booting for the Red team.

Smith a Standout

Smith gave indication of being an outstanding footballer from the very beginning of the game as he consistently passed, plunged and ran around the ends for large gains. His defensive work though not so sparkling, showed very few mistakes, and the few that he did make could be attributed more to inexperience in the Canadian game than to anything else.

What Smith was on the offensive, Charlie Letourneau was on the defense. A wing man this year, Letourneau was in on every play, and time and again broke through on the R.M.C. kicker, to either block or hurry the punt. Letourneau held a mortgage on all loose balls, and in the third quarter succeeded in converting one of them into a touchdown.

Smith Boots Field Goal

The McGill squad took the offensive from the start of the game, and play was only a few minutes in progress before Letourneau had dropped on a fumbled ball to give the Red squad possession on the R.M.C. thirty-five yard line. A line plunge by Craig netted an eight yard gain, and then Smith gave evidence of his ability by booting a field goal from thirty yards out. McGill 3; R.M.C. 0.

After the auspicious start the Shaughnessy host started an advance down the field that boded ill for the soldiers. Smith started by running for twenty-five yards on an extension play and then threw a long forward pass to Letourneau to put the ball on R.M.C. twenty-five yard line. An attempted place kick was blocked to relieve the pressure. The army was held to no gain on two successive plays, and then a McGill line man blocked McBrien's kick and Letourneau recovered on the three yard line. R.M.C. held on a plunge by Ruschin, but the big middle wing was not to be denied and on a second plunge crossed the line for five points. A Smith to Letourneau forward pass was completed for the convert. McGill 9; R.M.C. 0.

Play Kicking Game

The second period found the Red team playing defensive football and for the most part both teams were content with a kicking game. Here McBrien of the Cadets showed to advantage as he held the McGill team in its own territory with nicely placed punts. Towards the end of the quarter the McGill offense got underway, and at half time they were in possession of the ball on the R.M.C. twenty yard line.

After the rest session the local squad started a fresh offensive. Smith began by running back the kick-off forty yards, Craig then kicked deep into R.M.C. territory. A bad snap by the Cadet centre went across the goal line, and was turned into a major score for McGill, when Letourneau fell on it for a touchdown. The convert failed, McGill 14; R.M.C. 0.

R.M.C. Score Touch

In the final quarter Shaughnessy sent on his substitutes, Johnny Riddell and Tom Richert took over the attack for the Red team and kept the play pretty well at centre field, until a series of offside and a fumble gave the Cadets possession in McGill territory. For the first time in the game the Kingston team showed power on (Continued on page 7)

McGill Mourns

Dean MacKay

IN THE death of Dean Ira MacKay on August 19, 1934, McGill University in particular and Canada in general, lost a man whose name loomed large in the intellectual activities of the Dominion.

For fourteen years the name of Dean MacKay has been intimately identified with that of McGill University until his death from a heart attack at Chester, Nova Scotia, this summer removed from our midst an ardent scholar and a man who was always accessible to anyone who had occasion to seek his advice or assistance.

As dean of the Faculty of Arts the late Ira MacKay labored early and late in planning and supervising the many affairs which demanded his constant attention. He was a consistent supporter of all undergraduate activities at McGill University,—his greatest interest lying in the Philosophical and the Operatic and Choral Societies, in both of which he was Honorary President.

The late Dean MacKay was connected with McGill for a period of fourteen years, in 1924 succeeding the late Doctor James Harkness as Dean of the Faculty of Arts. He first became associated with McGill in 1920 serving in the capacity of Professor of International and Constitutional Law, as well as Frothingham Professor of Logic and Metaphysics. The Department of Philosophy was privileged to have Dean MacKay's connection till his death.

The son of Robert MacKay and Belle Paterson of Pictou, Nova Scotia, Dean MacKay, M.A., LL.B., Ph.D., LL.D., was born in Boston, Mass., June 5, 1875, receiving his preliminary education at Pictou Academy. He was graduated from Dalhousie University in 1891 with highest honors in mental and moral philosophy, coupled with distinction in classics. From Dalhousie University, Ira MacKay went to Cornell University, Ithaca, N.Y., where he was successively Scholar in Psychology, Fellow in Philosophy and Doctor of Philosophy. In 1905, the deceased returned to Halifax, studying law to graduate with an LL.B. degree and highest honors.

The following year found the future Dean of McGill at Winnipeg where he practised law for four years. From 1910 to 1913, he was Professor of Philosophy at the University of Saskatchewan. Next we find him for two years associated with the Department of Political Science, followed by a three year professorate of law in the same university.

In 1920 Dean Ira MacKay became identified with McGill as Professor of International and Constitutional Law, later Professor of Logic and Metaphysics. In January, 1924, he was appointed acting Dean of the Faculty of Arts, which position was confirmed June, the same year. From that period to his untimely death last summer, McGill reaped the benefits of Dean MacKay's brilliant scholastic ability and recognized keen perspective.

Whether considered as a foremost educationalist, a recognized student of philosophy, an outstanding jurist, a noted author or a firm believer in the destiny of McGill, in particular, and Canada, in general,—the late Dean MacKay has left an indelible imprint upon contemporary Canadian life and a stimulus to his conferees and student body alike to follow in his illustrious footsteps.

Welcome ---

IT IS with great pleasure that the Daily extends a hearty welcome to all the students at McGill. We are glad to see the old familiar faces of our friends of past years, to discuss the events of bygone days, and hourly the realization of how fortunate we are, grows upon us. To those who are attending college for the first time this may seem rather sentimental, for they are as yet strange to McGill, they are unable to feel its associations in the same way.

This same time last year college began, but with not the same spirit of optimism. The clouds of financial depression still hung very low, there was a feeling that all the world was going to the dogs. Today there is new light and hope on the financial horizon; people not only feel better, they are better.

And so it is at McGill. The past year has been hard, but we look forward with nothing but optimism. We shall be welcoming a new principal in our midst; a new Dean of Arts; new members in many of the faculties; and with them we sincerely believe that a new era of progress and happiness at McGill will commence.

In past years it has been the custom to welcome new students to McGill with wholesale admonitions on how to conduct their studies, their social relations and

their activities. This year we are not going to offer any helpful hints, except to remind all those who are at college for the first time, and those at college who have not yet learnt it, that you only take what you put in. Hence do not be afraid of work. Do not spend too much of your time in frivolous pleasures, and think twice before you commit yourself to join any club, activity or fraternity. Choose only that which you are certain you will enjoy, and give yourself enough time to benefit from it to the full.

Choral Society Will Rehearse "Requiem"

Conservatorium Group Opened New Season Last Tuesday

Brahms' "Requiem" has been chosen by the Conservatorium Choral Society as its main work for the year. A rehearsal of this work was held last Tuesday, and rehearsals will be held every Tuesday in the Conservatorium until further notice. The Choral Society is again under the leadership of Walter Clapperton, and Mr. Nolton will continue as secretary.

The Choral Society is open to all students of McGill who possess a singing voice, and no special choral experience is necessary. The Society is a function of the McGill Conservatorium of Music, and is not restricted to students. The work for the year will centre on the Requiem, and will include study of the Bach chorale, "The Sages Of Sheba," and "The Pied Piper Of Hamelin" by Parry. No membership fee is required and wherever possible the charges on music will be reduced.

The Society intends to include one hundred voices this year, and at the present time there is a special demand for men's voices, both Bass and Tenor. When this quota is filled, a concert in conjunction with the McGill Conservatorium Orchestra will probably be arranged. All former members are requested to come out next Tuesday, in order that the number of vacancies may be determined. All wishing to join this organization are requested to see Mr. Nolton at the Conservatorium Tuesday night. All are welcome, and there is a special need of men's voices. All rehearsals will begin promptly at 8.15, and the director wishes the members to be at the Conservatorium at eight o'clock, and to bring in all copies of the "Requiem" that have been retained from last year's session. Students will be welcomed, and are reminded that the Society rehearses only once a week, thus not claiming too much time from studies.

Correspondance

The Editor,
McGill Daily.

Dear Sir,—
This is to inform you that I find myself unable to accept the appointment of News Editor of the McGill Daily for 1934-35. I regret that I must submit my resignation, especially at this inopportune time, but had I known of your intention beforehand I would not have let my name stand, as circumstances will make it impossible for me to continue my work on the "Daily" next year.

Thanking you for the honour which you have bestowed upon me by this appointment, which, however, I must decline.

I am,
Sincerely,
(Signed) R. Malcolm Ransom.

Track Team Working Out At Stadium

Squad Seeks Fifth Consecutive Championship This Year

MEIKLEJOHN LEADS EXPERIENCED TEAM

Former Harvard Track Captain Turns Out For Hurdles

FOR the past three weeks Coach Van Wagner's track charges have been making the clinders fly on the vastly improved Stadium track in preparation for another successful campaign. Despite the loss of at least four members of last year's senior team, prospects of retaining the intercollegiate track crown for the fifth consecutive year appear brighter than ever. Of course, the fact that Goode, Hasler, Christie and Costello are lost to the squad lessens their chances. Goode was provincial and intercollegiate harrier champion, as well as victor in the three mile event at Kingston, and the others were also valuable men to the team. Nevertheless, the return of such veterans as Phil Edwards, Gerry Sampson, Jim Worrall and Gordie Meiklejohn assures "Van" of a squad second to none in Canadian college circles.

Meiklejohn, who this year has the signal honour of being captain of both the track and hockey club, is all set for another record-breaking season. It will be remembered that in last year's meet at Kingston he set two new records, in the discus and shot. His performance of over 38 feet in the shot put replaced a mark that had stood since 1909.

Edwards in Shape
Phil Edwards has had an active summer, what with participating in several Canadian meets and in the British Empire Games. As a representative of British Guiana at London, Phil scored a brilliant win in the half-mile. Gerry Sampson, another half-miler, has not been idle either this summer. He ran in Canadian meets with Edwards, and wore the Maple Leaf at the Empire Games.

Jim Worrall, the third member of the McGill triumvirate at the London meet, accounted for a second place in his favorite event, the 120 yard high hurdle. He also displayed his versatility by competing in quarters and half miles, 440 yard hurdles, broad and high jump, and divers other events in Canadian meets. Thorly Goodfellow, last year's sprint sensation, has been keeping in shape through the summer months. Irv Smith, high jump champion, and Charlie Wisdom and Doug Amaron, members of last season's victorious relay team, are also ready for another banner year. Redewill, Morgan, and Anderson, field men of last year's senior team, have also been reporting regularly for practice at the Stadium.

New Hurdler
A welcome newcomer to the hurdling ranks is a Harvard man named Record. A powerfully built redhead who was the Crimson track captain two years ago, he and Worrall will form a fine combination for both the 120 and 220-yard hurdle events.

In preparation for the Senior Intercollegiate Meet which takes place here on the 19th of the month, the track has undergone several improvements. The new surface, which contains a large proportion of clay, is proving very fast and springy. The rock at the east end of the straightaway has been blasted out, and the starting line placed several yards back. Coach Van Wagner invites all newcomers who are interested in track to turn out this week. Equipment is supplied by the club. The Interfaculty Meet is just eleven days away. Beside the nineteen places on the senior team there are also nineteen to be filled on the intermediate team, which meets R.M.C. on October 28th. Practices are held daily at the Stadium, from 3 to 6 p.m.

McGill Players To Meet On Thursday

Hold Opening Gathering In Union Ballroom

The McGill University Players' Club will hold its first general meeting on Thursday afternoon at 5.00 p.m. in the Ballroom of the McGill Union. All undergraduates interested in any phase of dramatic work are urged to attend this meeting, at which the year's activities of the club will be outlined by the president, Howard Stikeman.

Ranking among the most active organizations on the campus, the Players' Club presents two major productions during the season, together with a series of one-act plays, this latter being sponsored by the Workshop Department of the club, of which Harriet Colby is chairman. The activities of the club give ample opportunity to all those interested in becoming acquainted with every phase of play production from acting to back-stage work, lighting and make-up.

The president extends a hearty invitation to all freshmen and freshettes, as well as to upper year students to attend the opening meeting of the club.

Managers Needed For Many McGill Athletic Functions

Freshmen In Particular Urged To Assume Managerial Tasks

APPLY AT STADIUM

McGILL'S varied athletic activities, nineteen clubs in all being involved, get under way once again today after a long lay-off, though the footballers and track men have been hard at it since the middle of September. In addition to football and track, the Boxing, Wrestling and Fencing Club, the English Rugby Club, the Golf Club, the Soccer Club, the Tennis Club and the Harrier Club are all due to start work within a few days so that there will be a wide choice available to the athletically inclined.

In order that these clubs may function properly it is necessary that student managers be appointed to take charge of them. Last spring a much needed managerial system was introduced by the Athletic Board of the University for the purpose of handling the situation. The system in the main provides for competitors for the various managerial positions rather than filling the jobs by appointment. The competitors will be drawn from the Freshman and Sophomore classes and will serve for a period of one year in competition for assistant managers' posts, while the Senior managers will be chosen from amongst the most capable of the assistant managers of the previous year.

A Few Vacancies

At present there are several vacancies which must be filled immediately. The Football Club is in need of a number of freshmen and sophomores to take care of the many duties pertaining to the club and would welcome applications from the incoming classes. Several of the other organizations need larger managerial staffs as well. The pressing need at the moment is that of the footballers, however, and all those interested are asked to report at the Field House at Molson Stadium any time after 3 o'clock this afternoon, or any afternoon this week. Ask for the Senior football manager or assistant manager. Those interested in other clubs should hand in their names at the Athletic Office in the McGill Union, stating with which sport they prefer to associate themselves.

Track Notice

Track practice is being held at the Stadium daily, from 3 to 6 p.m. Candidates are needed for both Senior and Intermediate teams. All men interested are urged to turn out at once. Interfaculty Meet, Thursday, Oct. 11. Senior Intercollegiate Meet, Friday, Oct. 19, at McGill. Intermediate Intercollegiate Meet, Friday, Oct. 26, at McGill.

Linksmen Prepare For Annual Match

Squad Will Defend Intercollegiate Crown On Oct. 12

CORRIGAN ELIGIBLE

IN a little less than two weeks, McGill's intercollegiate golf champions will take to the links in defense of their title. No steps have been taken as yet to determine the personnel of the squad, but it is expected that the necessary trials will be held this week.

It is not yet known at this early date exactly who will try out for the team, but judging from the past summer's efforts of seasoned McGill golfers, this year's squad will at least equal, if not surpass in strength the group which wrested the championship last year from the University of Montreal. Among these are Bob Costello, Jim Brodie, John Caggeorge and Tom Calder, all of whom have been prominent for several years now in Red links circles.

Corrigan Prospect

The most promising prospect though is Frank Corrigan who was ineligible for play last year due to his previous season's affiliation with Toronto. Corrigan has just completed a splendid campaigning summer, with a victory in the Quebec Spring Amateur Open his crowning achievement. This notable triumph, added to his other wins in the Ottawa City and District tourney and, with his father, in the Quebec Father and Son Tournament, make Corrigan a man to be watched in the forthcoming intercollegiate games.

The most important factor in the choice of the Red squad is the Student-Professor Golf Tournament, for it is upon the results of this tourney that is based the selection of the team members. Those students who card the lowest aggregate scores are invited to further try-outs, and the final selection is then made. Plans are at present underway for this important tournament, and it is hoped that it will be commenced by the end of this week.

All prospective sports reporters for the McGill Daily are asked to see John Nolan, Sports Editor, at the Daily office this afternoon or tonight.

McGill Eight Races Varsity This Week

SATURDAY next will see a renewal of the intercollegiate rowing rivalry between the McGill and Toronto eights. The Varsity crew will be out to defend the championship which it has held for the past six years. While no official reports have come from Toronto, it has been rumored that the blue and white crew is as strong as it ever has been.

The McGill eight has been practicing steadily for some time now, and has high hopes of turning back the Varsity forces. Three newcomers have been added to the Red crew this year in the persons of 'Pep' Bourne, Bill Butler and Louis Vacek. These three men are all powerful rowers, and backed by the experience of the rest of the crew will be important factors in next Saturday's race. Harold Elliot, Bill Carter, Moe Blumer, Louis Johnson captain of the team, and Lorne Gales the ever-reliable stroke, are the members of last year's eight who will be in the shell again next Saturday.

McGill Team Strong

With this strong contingent of oarsmen, the monopoly which has been held so long by the Varsity crew, is in great danger of being overthrown, and Saturday's race should be an epic one in the history of the event.

Tennis Tournament Is Scheduled For Early Next Week

Bob Murray Outstanding Contender For College Crown

WITH the opening of the 1934-35 term, interfaculty sports get underway, with the annual tennis tournament, to be held next week, leading the parade. From those who show best form in the tournament will be picked the team that will defend the intercollegiate tennis title, which was won by McGill at Toronto last year. The intercollegiate tourney is scheduled to be held this year at the University of Montreal's home courts Oct. 18, 19, and 20.

Competition in the tournament is sure to be keen, for of last year's championship team of Watt, Murray, Surveyer, Farmer and Robertson, Watt and Farmer will be missing through graduation. Manager John Gibbon will be on the lookout to unearth any latent talent to replace them.

In last year's tourney, Laird Watt took the measure of Bobby Murray in the finals, defeating him in three straight sets, 6-1, 6-4, 6-4, a score that was not really indicative of the close trend of play. Murray has been showing fine form in tennis competition this summer, annexing the provincial singles crown, and a few other minor titles. His tour of United States tennis courts this summer, where he met plenty of ranking American talent, will also stand him in good stead.

Fabre Surveyer and "Rock" Robertson, semi-finalists in last year's tournament, are other players to be reckoned with, and should be counted on to support the McGill banner in the coming intercollegiate tourney.

The loss of Laird Watt will be keenly felt and he will certainly be hard to replace. However many men are expected to make a strong bid for his place on the team. Gordie Meiklejohn, hard-hitting left-hander is sure to provide keen competition, as is Harry Schwartz, who has been showing steady form in city tournaments this summer.

The date of the tournament will be announced this week. Entries will be accepted at the tennis court, and a large list is expected.

SOCCER PROSPECTS BRIGHT AS SQUAD RESUMES TRAINING

HAY FINLAY'S Soccer charges have been going through their paces for the past two weeks and from appearances are due for a very successful season. Only three men have been lost to the team through graduation, Ross, Kecece, and Carter being lost to the fold, and with only these three positions to fill Coach Finlay feels confident that the Soccer championship will return to McGill confines again this year.

Captain Jimmy Harkness will once again take over half the full-back duties. Owen, Flood, Horsnall, Minnion, Garber, and Lowe stand ready to fill the three vacancies in the half back division. One of these in all probability will step back to the rear-guard and team up with Harkness in the important full-back position.

Carter Out

Of last year's forwards all but Carter are on hand, which leaves Finlay with the makings of an extremely powerful vanguard. Cooper, Innes, Nolan and Jones have all reported their readiness to try out again for places and will constitute a fairly formidable attacking force.

The important goaling position, vacated by Ross, to date looks to be booked by the very capable Ken Evelyn. Practices are being held daily on the Upper Stadium and with turn-out increasing with every practice the squad will no doubt round out into one of championship calibre.

SPORTS NOTICES

FOOTBALL TICKETS

The Athletic office will not exchange football tickets on Saturday mornings.

MANAGERS

Freshman candidates for managerial positions in connection with football, see senior manager Frank Gorman at the Stadium any afternoon between 3 and 5.

WRESTLING

All prospective wrestlers are asked to be present at the Montreal High School gym between 5 and 6 o'clock today, to meet Coach Frank Saxon.

SOCCER

Soccer practices are being held daily at the Upper Stadium between 4 and 6 o'clock. All students interested are asked to make an appearance. No previous experience required.

CALL GOES OUT FOR FROSHEFOOTBALLERS

ALL first year men eligible for the above team are cordially invited to attend the daily practices commencing at 4 o'clock each afternoon at the Molson Stadium. A considerable number of players have been in training since September 17th but the team will not be finally decided upon until a couple of days before the first game.

One Monday, October 1st, between the hours of 9.30 and 12.00 and 2.30 and 5.00, please attend at 3494 University Street for a medical examination. Then on arriving at the Molson Stadium apply to Mr. Angus MacMorran, Manager, for a uniform and an eligibility form which must be completed by each player. Provided enough candidates turn out for practice it may be possible to have two teams, one in the Intermediate Intercollegiate league and one in the Junior Intercollegiate league.

Games Schedule

The schedule of games is as follows: Oct. 10—Bishop's College at McGill. Oct. 17—Loyola College at McGill.

Oct. 20—McGill College at Bishop's (Lennoxville).
Nov. 3—McGill College at Loyola.

Y.M.C.A. RESIDENCES

CENTRAL—1441 Drummond Street — MA. 8331

Tastefully decorated rooms with private telephone, running water if you wish. Over 500 of them, at various prices (all moderate), the majority outside. Washrooms on all nine floors.

WESTMOUNT—4585 Sherbrooke St. W.—WE. 1200

A congenial "neighborhood Y" overlooking Westmount Park, with its library and athletic fields. All facilities, including gym, pool and cafeteria.

NORTH—5550 Park Ave. CR. 2253

Central location in the North End. Good rooms at reasonable rates. Pool and complete physical equipment.

Close To Work!

Central is at the heart of the downtown district (less carfare). Westmount within twenty minutes of it. North Branch the same distance from the downtown area.

Close To Play!

A good floor, a pool, mats, balls, apparatus, showers — and lots of good fellows to enjoy them with. Clubs, groups and social activities. Educational features, too, to help you keep up with the world and your job.

"Pit" Now Serving Meals In Strathcona Hall

EXPERIMENT SUCCESS

The Pit, student co-operative restaurant, begins its second year of catering to the student public this morning. Breakfast, morning coffee, lunch, afternoon tea and dinner will be served today and every college day hereafter at moderate prices. This restaurant—student owned and student operated—is located in the basement of Strathcona Hall.

As the Pit is operated on a non-commercial basis, profits, if any, are distributed to the student holders of meal tickets. Though last year was the first time that this novel co-operative scheme had taken definite form on the McGill campus, sales at the Pit totalled \$7,124.86. Inasmuch as meals are priced at a minimum, the net profit accruing from these sales was \$21.90, of which \$21.40 was distributed among meal-card holders.

Students Benefit

During last year, some forty five men and women students were assisted—generally in the form of meals—in return for services at the Pit. Again this year, there will be an opportunity for any interested to do a little part-time work in this way. Arrangements for doing work during the session (serving, washing dishes, etc.) may be made by calling at the Pit office, downstairs in Strathcona Hall at any time.

According to a statement released by the Advisory Committee last night, it is felt that the Pit experiment is amply justified. There was an average daily attendance of 188, most of whom came for lunch, though morning coffee and afternoon tea proved popular features, and were made doubly attractive by the piano and the informal air that prevails at the Pit.

into the Pit for meals or "just a cup of coffee."

Changes Made

Several improvements and changes have been made for the coming year, according to last night's announcement. The services of a Swiss chef who has had 20 years experience in Europe and Canada have been acquired. The decorative scheme has been altered to some extent and it is hoped, improved. The meal-card plan of last year will be continued and at the end of each term the holders of these cards will share all profits.

Gertrude E. Cooke, Science '36 has been appointed hostess in charge of the dining room for the coming year, while Georges Haythorne, Graduate School, last year's manager, will continue in a supervisory capacity. Tea dances, particularly after rugby games, are being planned. Students are at all times and at all hours invited to drop

PARKER PENS & PENCILS

Montreal Book Room Limited

1455 McGill College Avenue

A PARKER PEN

Will Increase Your Efficiency

...and whether you want to pay little or much, there's a Parker obtainable at your price.

It means a good deal to own a pen that is acknowledged as the aristocrat of its kind. Every Parker Pen has a Jewel-smooth, pressureless-writing point that glides over the paper without effort. It takes the "chore" right out of writing—turns it into a pleasure!

And Parker's handsome streamlined pens, each with a neat pencil to match, give a wide choice in up-to-the-minute, stylish colours. The barrels are unbreakable. The clips are placed at the top of the cap so that the pen or pencil sets low in the pocket—does not spoil the appearance of the clothes.

Yet the price is within everyone's reach. Choose a Parker to-day—it's a pen you can boast about.

The Very Latest thing is the **PARKER VACUMATIC**

Fills by Vacuum — Holds 100% more ink—shows when to refill.
PEN—\$7.50, \$5.00
PENCIL—\$2.50

PARKER PENS and PENCILS

At this wide range of prices:

PARKER MODERNE — Pen \$2.75, Pencil \$1.25
PARKER PREMIERE — Pen \$3.00, Pencil \$1.50
PARKER DUOFOLD — Pen \$5.00, Pencil \$2.50

Experiment On Eggs Carried Out At Cornell

Syracuse, N. Y.—The poor chicken no longer has any privacy. Cornell's Department of Poultry Husbandry has pedigreed her, treated her with ultraviolet rays, and picked her mate; now it is attacking her last stronghold—the egg.

For three years experiments have been conducted to measure the qualities of the eggs laid by each hen and classify them according to the type of egg laid by her and her progeny. It is quite possible that 12 more years will elapse before final conclusions can be reached.

The problem is being conducted by Alfred Van Wagenen, instructor in Poultry Marketing. The eggs of each hen are first candled and then broken open. The albumen, or "white," of each egg consists of three layers, an outer thin layer, a thick layer, and an inner thin layer. Each layer is separated and measured, the thick layer being scored for appearance. Also, the poorer the quality of an egg, the more this albumen it contains; thus each egg is rated by the percentage of thin albumen to the whole.

After the albumen is measured, the yolk is allowed to stand for a few minutes. The height and width of the yolk are then taken and the yolk also rated as to appearance. The greater the ratio of height to width, the better the yolk. It is then classified as to color according to a color chart developed by Prof. P. F. Sharp of the Department of Dairy Chemistry. As yet, no relation has been discovered between the color of the yolk and the quality of the egg.

Pick Dark Yolk

An amusing sidelight on this point was developed during Farm and Home Week. Two yolks, one slightly lighter than the other, were displayed and the visitors invited to choose the better yolk; 72 percent chose the darker yolk, although as yet no scientific proof of any difference beside that of color has been discovered. The reasons for choosing the dark yolk ranged everywhere from "It looks better" to "It bakes better cakes."

It has been proved through experimentation that the shape, size, and color of eggs are hereditary. Consequently, it is profitable to discover the best hens in a flock and breed them so as to keep the good egg characteristics dominant.

Restaurant Owner Beats Depression

Columbus, Ohio.—An enterprising manager beat the depression around the corner when it began to hit his cafeteria, and with a sense of humor combined with some architectural strategy he succeeded in making his cafeteria the most popular one around the Ohio State university campus in Columbus.

After analyzing the problem, the manager decided that the dearth of customers was due to the fact that one huge dining room did not appeal to students who wished to eat in small groups and in privacy. With the aid of Prof. Howard Dwight Smith, university architect, the dining room was divided into smaller sections.

Now on the west side of the room shut off from the main dining room by French doors, there is an alcove where small parties and committees meet and dine in privacy. The north wing of the main dining room has been shut off from the old room by removable glass doors, and here one receives table service.

But it is the doors, to this north wing which attract attention and show a sense of humor. In the center of the doors are two medallions, one representing the university seal done in

striking colors, and the other is a very, very beautiful pig made of colored leaded glass, dancing and tooting on a flute. Across the top of the "piggy" medallion is the inscription "A Little Pig Went to Market," and around the base are three large "P's."

So now everybody is happy, and the Three Little Pigs are packing them in daily, while an ever increasing number of men students flock to the cafeteria to eat the food, look at the piggies, and smile at the co-eds.

Claims White Man Not Really White

New York City.—Varily, it is easier for a white man to become a Negro than for a Negro to become white.

Maybe you think you're pure white, but Dr. Marc A. Groubard, research assistant in the zoology department of Columbia University, dispels that superior notion when he explains that there is no such thing as a pure white race. It is really gray, for everyone is endowed with a certain amount of pigmentation, that of the white skin being merely less concentrated than that of the Negro.

Whites Have Inhibitions

Certain conditions to which the white man is subject produce changes in pigment so as to make a Negro, in color, out of a white. This happens in diseases such as Addison's disease. Also, certain kinds of tumors are black. As a result of years of experimentation Dr. Groubard has come to the conclusion that "white skin contains certain inhibiting conditions that Negroes do not have." (And if you're not careful your inhibitions will get you.)

Flies have proven the most valuable insects for experiment in this field since it has been found difficult to separate the pigment from the skin and hair in mice. Results of these experiments with flies may be applied to man and others, Dr. Groubard said, because the problem of color and its production is the same in a great many different animals. Incidentally, it is the most variable characteristic of different races.

Skin Contains Catalyst

Explaining the technicalities of this problem, Dr. Groubard remarked that all skin contains the substance which produces the pigment as well as an enzyme or organic catalyst. The latter is a substance aiding or retarding a chemical reaction without being used up in the process.

At first it was assumed that the reaction in whites was prevented by a definite substance. When they were unable to isolate such a chemical they concluded that it is rather a condition which produces the gradations of color distinguishing one race from another.

Professor Advises Teaching Of Humor

Madison, Wis.—We will have to accustom ourselves to pedagogic humor and practical joking à la Aristotle if the suggestion of Dr. William McAndrew, former superintendent of Chicago schools, becomes fact.

Dr. McAndrew's proposal that the colleges and universities establish chairs of humor would have a revolutionary effect not only on American education, but also on American literary life. Clutched under the students' arm would no longer be histories of poetry but of Judge and Life, and only the more advanced students would be exposed to Ballyhoo.

Would Teach Laughing

Just as logic has taught us how to think, a course in humor would teach us how to laugh, not the laughter that comes from somebody slipping on the ice, but the subtler, silver humor found tucked into the odd corners and quirks of everyday life.

Textbooks and lectures would take on a new meaning if the class recognized a professional sally or a Rabe-

laisian ditty, and the odd jokes would fall into grimy graves. In their places would appear humor that would not smack even faintly of "That's not a lady, that's my wife."

To Grant B.H.

The most important factor to be considered in establishing a chair of humor is the professor conducting the course. What kind of humor will be preferred? Will he lecture according to Balzac, Will Rogers, or Eddie Cantor? Will the students be conducted through the ramifications of Shavian wit, or will they be fed vitamin "Z" to develop a sense of humor?

Will the professor be able to choose his own brand of humor or will the board of regents have to pass on the jokes, not realizing that a joke today may be a tragedy tomorrow?

When it comes to getting a degree, what better qualification could a graduate have when he seeks his fortune in the metropolis of the world than that he has a sense of humor. The day may yet be dawning when a diploma will read "John Jones, B.H. (Bachelor of Humor)."

California To Have New Type Of Iron

Berkeley, Calif.—As the result of experimentation in the Bureau of Mines station on the campus of the University of California a new type of iron industry may develop in that state.

Although California is handicapped in the production of iron from blast furnaces due to a lack of coking coal, it has an abundance of the two natural resources required to produce "sponge iron"—pyrite cinder and natural gas. It is called "sponge" iron because of its porous nature.

In the newly discovered process, natural gas takes the place of coking coal, so indispensable in the blast furnace procedure. A residue from the

process of making sulphuric acid from pyrite, and pyrite cinder is reduced in a rotary kiln devised by the Bureau of Mines. The "sponge" iron is of a grade which can be substituted economically for other sources of raw iron.

The production of "sponge" iron by this process is estimated to be less expensive locally than if it were produced by the blast furnace method. It is also approximately equal in cost to the production costs in the eastern iron industry.

Since California does not use enough pig iron to make it profitable to construct blast furnaces, to say nothing of the lack of coking coal, it may be seen that the possibility of the birth of an iron industry in this state overcomes economic and natural difficulties which have heretofore prohibited the local production of iron.

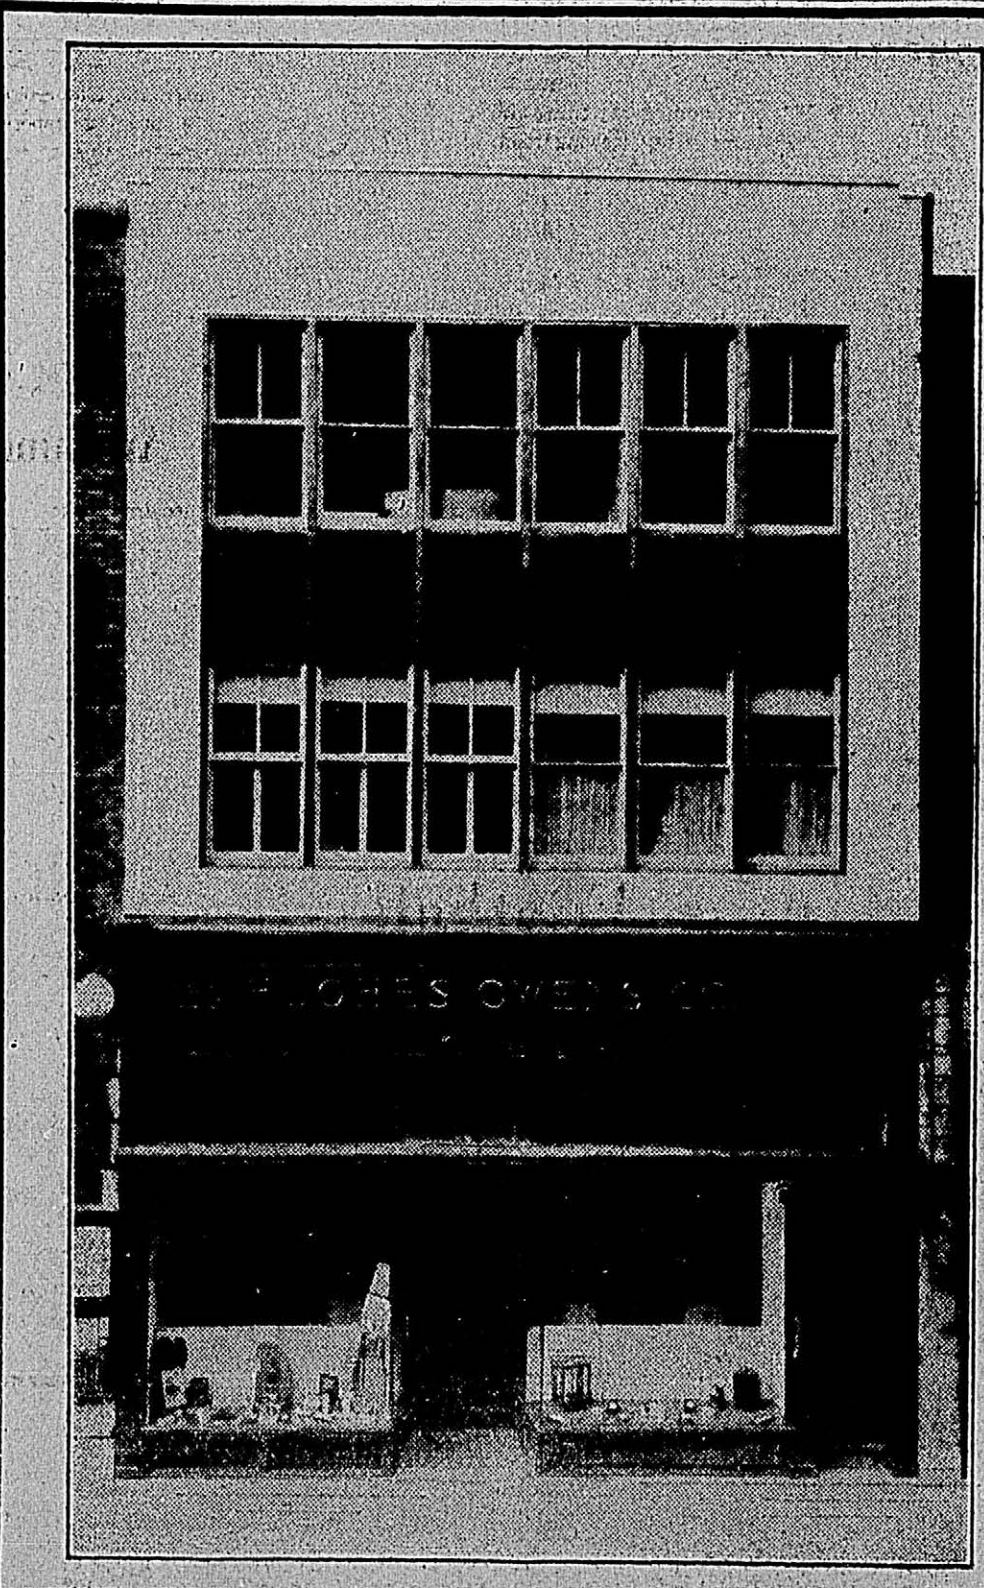

Medicine Needs More Women

Baltimore, Md.—More women are needed in the practice of medicine, Dr. Joseph Colt Bloodgood, eminent cancer specialist, told the student body of Goucher College.

Woman was once considered an inferior, but now that we've educated her she may prove a superior being," Dr. Bloodgood said.

"I feel confident that we need, in all the civilized countries, a large number of women fundamentally trained in the medical sciences, not only a practitioner of medicine in the specialties and general practices, but in laboratory positions, research work, and in the public health."

"My experience teaches me that women are taking to preventive medicine quicker than men. The greatest protection against disease today is the continuous care of the medical and dental profession, and we need more of the best trained women physicians."

Neurological Institute Opened Doors Thursday

(Continued from page 1)
then given by Dr. Harvey Cushing, professor of experimental surgery at Yale University, author, scientist and dean of all modern neurosurgery. Dr. Cushing referred to the unsuccessful attempt on the part of a group of young surgeons to found a national institute of neurology in the United States shortly after the war. In the Montreal centre he saw the fruition of the seed sown more than a decade ago. Referring to the debt which the United States owed to Canada for such men as Sir William Osler, Dr. Cushing humorously stated that along with the Rockefeller grant the American people threw in the Director for good measure.

Long Training Needed

six after graduation in medicine, which are necessary for the highly specialized skill requisite for neurosurgery can now be spent at the newly-founded Institute where the most modern equipment is provided. Such training however is dependent more upon the spirit of those laboring within, than upon the Institute itself. He predicted that a new and significant chapter will be written into this branch of medicine. Dr. William Cose of the Institute's staff expressed the appreciation of Dr. Cushing's lecture.

A member of the staff of the National Hospital, Queen's Square, London, England, and editor of the neurological journal "Brain," Dr. Gordon Holmes the second Foundation Lecturer was next introduced by Dr. C. K. Russell. The British neurologist advised the co-ordination of the study of the treatment of nervous diseases with that of normal function and warned against the isolation of neurology from the other branches of medicine. Quoting from Bacon, Dr. Holmes asserted that truth may arise more easily from error than from confusion and thereby cautioned students from laying too much emphasis upon elaborate equipment when some of the greatest scientific discoveries have been made with crude facilities. He ranked accuracy of observation and description as the most desirable qualifications for a good clinician as well as intellectual honesty and independence of thought.

Appreciation of Dr. Holmes' address was offered by Dr. F. H. Mackay after which conducted tours of the Institute were undertaken, tea being served by the nurses.

Governors of McGill University and the Royal Victoria Hospital present at the ceremony were: W. M. Birks, John W. Ross, Sir Charles Gordon, Sir Herbert Holt, Hon. A. J. Brown, Lt.-Col. Starke, Lt.-Col. Herbert Molson, Huntly Drummond, Brig.-Gen. Meighen, J. W. McConnell, T. B. Macaulay, W. A. Black, Hon. Smeaton White, Dr. W. W. Chipman, George Q. McDonald, George S. Currie, Homer Jaquays.

Out-of-town guests included: Dr. Percival Bailey, University of Chicago; Dr. Francis Hall, University of Toronto; Dr. Whipple, of New York; Dr. Greenfield, Queen's Square Hospital, London; Dr. Dussier de Barenne, of Yale University; Dr. Bazett, University of Pennsylvania; Dr. Stanley Cobb, Massachusetts General Hospital; Dr. John Fulton, of Yale University; Dr. Kenneth McKenzie, and Dr. Eric Linell, University of Toronto; Dr. Tracy Putnam, Boston; Dr. Henry Riley, New York; Dr. Byron Stookey, New York; Dr. Francis Grant, University of Pennsylvania; Dr. Max Peet, University of Michigan; Dr. Sylvio Coron, Laval University; Dr. W. T. Connell, Queen's University; Dr. Dorothy Russell, London; Dr. William Ladd, Cornell University; Dr. Winchell Craig, of the Mayo Clinic.

Others present included: Rev. O. Maurault, of the University of Montreal; Howard Murray, representing the Corporation of McGill University; T. H. Matthews, registrar, and A. P. S. Glasco, bursar of the university; and the following Montreal guests and members of the staff of the Institute: Dr. Penfield, Dr. Russell, Dr. F. Mackay, Dr. Cose, Dr. J. Saucier, Dr. E. Legrand, Dr. Amyot, Dr. Young, Dr. Petersen, Dr. A. R. Elvidge, Dr. Morphy, Dr. McEachern, Dr. Keith, Dr. Evans, Dr. Gage, Dr. Stavsky, Dr. Torkildsen, Dr. Fraser, Dr. Byers, Dr. Hoen, Mr. Geo. Ross, Mr. Phillips, Mr. A. A. Hodgson, Sir Andrew Macphail, Dr. S. Boucher, Dr. Reford, Dr. Masson, Dr. de Bellefeuille, Dr. J. C. McKenzie, Dr. C. Howard, Dr. van Campenhout, Dr. Rhea, Dr. Hamilton, Dr. Archibald, Dr. Meakins, Dr. Keenan, Dr. Ballon, Dr. McKenzie, Dr. Murray, Dr. Francis, R. H. MacDonald, Dr. Hingston, Mr. MacDougall, Col. Cape.

The appearance of the Neurological Institute may be best conceived from the architect's description. "The ground floor contains the janitor's and maids' quarters, general linen storage, blanket and mattress sterilizing rooms, the receiving room, rear service en-

Greet Fiftieth Class Of Woman Students

**Sophomores Extend Wel-
come At Tea In R.V.C.**

A half century of woman's education at McGill was passed in review Friday afternoon when the fiftieth class of women students at McGill were greeted at an informal tea in the R.V.C. by Mrs. Walter Vaughan, warden. The occasion was a reception tendered by the second year students to those entering the university for the first time.

In addressing the class of 33, Mrs. Vaughan made special note of the debt of gratitude owed by McGill coeds to the late Lord Strathcona who originally endowed woman's education at McGill and whose generosity was responsible for all the privileges they now enjoy. She emphasized the fact that his donation of \$50,000 was exactly the same amount as the original grant of James McGill for the foundation of the entire university.

The warden noted the great contrast between the original graduating class of eight students and the present large enrolment. In mentioning the great number of students who have passed through the portals of the R.V.C. she pointed out the responsibility of the present-day students to maintain the high standards which they set.

Harriet Colby, president of the sophomore year presided while music was provided by Claire Freeman and Muriel Johnson. A number of prominent women students were present.

Trance and communication by subway with the adjoining Pathological Building.

"The main entrance from University street is on the first floor. The entrance vestibule itself is impressive because of the architectural treatment and materials used in construction. It leads to the main reception hall with office and doctors' cloak-rooms adjacent. In design and decoration the reception hall is quite a departure from the usual form and color effect. The reception hall contains a statue bearing the legend 'La nature se dévoile devant la science'.

"Corridors lead left and right to the lecture theatre, the photographic and micro-photographic rooms, studies, offices and examination rooms. The second, third, fourth and fifth floors provide the hospital facilities of the Institute. The second and third floors each have four-bed and twelve-bed public wards with the necessary waiting rooms, utility laboratory, linen kitchen, and a room for dressings. There are also two observation rooms on each floor for critical cases and recovery. Each floor has connection to an outdoor solarium overlooking the Percival Molson Memorial Stadium and commanding a magnificent view. The fourth floor provides two semi-private, three-bed rooms, eight private rooms and one isolation one-bed suite, together with utility rooms, laboratory, kitchen, nurses' room, nurses' stations and sun-room.

"The fifth floor contains the operating suite with its operating room and visiting doctor's gallery, encephalography room and visitors' gallery, room for visiting doctors, doctors' dressing room, surgeons' room, anaesthesia room, sterilizing and linen rooms.

"The x-ray department includes the x-ray and transformer rooms, dark room, x-ray filing and dictaphone rooms, x-ray viewing room and dictation room. On the same floor is the suite of consulting and examination rooms, patients' waiting rooms and secretaries' offices.

"The sixth floor is set apart for research and consists of offices for the director, the secretary and neuropathologist, laboratories for the chemist, fellows, pathological fellow, routine technicians and for individual research, workers, a well-equipped library, formalin and general storage rooms.

"The seventh floor consists of squash racquet courts, treatment room, physiological fellows' office, physiological room, animals and animal kitchen.

"The eighth floor provides complete residential accommodation for eight fellows. Communication at the third floor level by a bridge over University street, between the Institute and the Royal Victoria Hospital, has been provided."

Offer Sympathy

During the past summer, the student body of McGill suffered many bereavements, among others Austin Dettmers, Donald Forbes, and Gordon MacCracken.

The Daily wishes to offer its most sincere regrets to the families of those bereaved.

Announcements Of Promotions Made

**Appointments In Faculties
Decided Upon This
Summer**

GEST LIBRARY OPEN

At the annual meeting of the Finance Committee of McGill University held on July 5th, 1934, the following professorial appointments and promotions were forwarded to the Board of Governors.

New appointments to the University staff include G. W. Scarth, M.A., D.Sc., and C. L. Huskins, B.S.A., M.Sc., Ph.D., D.Sc., who become, in the case of the former, Macdonald Professor of Botany and Chairman of the Department of Botany, and, for the latter, Professor and Chairman of the Department of Genetics.

Appoint. Following

H. D. Southam, D.Ped., has been elevated to the position of Assistant Professor in the department of Education for the session 1934-1935 while Stuart Hawkins, B.Arch., has become identified with the Superintendent Engineer's Department. Replacing Dr. John Beattie, resigned, as lecturer in Anatomy for the session 1934-1935 is James S. Baxter, M.D. At Macdonald College H. J. Brodie supplants Dr. Dorothy E. Newton, who has resigned, as Lecturer in Plant Pathology.

Included in the Finance Committee Report are announcements of several female appointments among whom are Miss E. K. Elderkin, Miss Blanche Stewart and Miss Helen Cannell, all of whom are to be associated with Macdonald College, St. Anne de Bellevue.

Macdonald Promotions

Miss E. K. Elderkin has become appointed Lecturer in Art and Interior Decoration in the School of Household Science and School for Teachers, replacing Miss Russell, who has resigned. Replacing Miss Freda Kruse, resigned, Miss Blanche Stewart has assumed the position of Kindergarten Director in the Practice School at Macdonald College. Due to Miss Catharine Seiveright's resignation as a teacher in the High School at Macdonald College, Miss Helen Cannell has assumed that position.

Four promotions were included in the summer report of the Finance Committee. Professors W. L. G. Williams, M.A., Ph.D., A.H.S., Gillingham, M.A., Gordon Pall, B.A., M.A., Ph.D., and H.E. Rawlinson, M.Sc., M.D., were given advancement at McGill University.

Both W. L. G. Williams and A. H. S. Gillingham become Professor of Mathematics from their former positions as Associate Professors. Gordon Pall and H. E. Rawlinson have assumed the position as Lecturer to Assistant Professor, the former in the Department of Histology and Embryology.

Contrary to a previous report, the School for Graduate Nurses is to continue being financed by the nurses themselves, though the Chinese Studies and Gest Library are discontinued, though the Library is to remain open.

Official Convocation Figures Announced

(Continued from page 1)

versity last year was 3960 as compared with 3886 for the previous session. At the present time the figures for the current year are not as yet available but officials at the registrar's office state that the registration seems "about as heavy" as last year.

Nazis Co-ordinate
Protestant Church
Despite Opposition

On September 23, after riding roughshod over all opposition, Reich Bishop Mueller was consecrated head of the German Protestant Church. His consecration marks, at least officially, the culmination of a long struggle for church unity waged since his election to the office of Reich Bishop by a National Synod on September 27, 1933.

It also signals the formal triumph of the German Christians and their conception of the Church as an instrument for the inculcation of National Socialist ideology. Henceforth the authorities will enforce the Aryan paragraph barring from church offices all who are of Jewish descent or have married Jews.

That this victory is far from complete is evident from a statement issued on the day of consecration by the Free Confessional Synod, a body opposing the Reich Bishop and representing about a third of the Protestant pastors in the Reich. This statement, read from the pulpit by many opposition pastors, championed the idea of a free church and condemned church unification under Nazi auspices as an attempt to submerge the various Protestant confessions and impose a "Nordic-Christian hybrid religion." The investment of Dr. Mueller, it said, should fill every Evangelical Christian "with deepest shame and sorrow."

The final "coordination" of the Protestant Church was accomplished only after the application of drastic measures to the opposition. On August 9 the National Synod, dominated by the German Christians, approved a series of laws sanctioning Dr. Mueller's acts and requiring all pastors on pain of dismissal to take an oath of allegiance to Hitler and to act "in accordance with instructions issued by the German Evangelical Church." Aided by his civil administrator, Dr. August Jaeger, the Reich Bishop proceeded to enforce obedience by the various state churches and to suspend recalcitrant pastors. In Baden a church synod which opposed coordination was dissolved and a new one appointed which promptly voted submission. The subordination of the Bavarian and Wurttemberg churches, decreed by Dr. Jaeger on September 6, proved more difficult. Supported by a majority of their pastors and congregations, the bishops of these two state churches publicly protested against coercion. On September 15 Bishop Wurm of Wurttemberg was suspended, ostensibly for using church funds to finance the opposition to Dr. Mueller; and four days later he was placed in "protective custody." At the same time a number of noted professors of theology were removed from office, and the sale and distribution of the writings of Dr. Karl Barth, a noted opponent of the German Christians, were forbidden. No move has yet been made to depose the Bavarian Bishop, Dr. Meisner, who protested the suspension of his Wurttemberg colleague and took occasion in a sermon on September 23 to renew his denunciation of the Reich Bishop. Nor has any action been taken against the Bishop of Hanover who, despite the coordination of his church, appears to be successfully organizing a secessionist movement in defiance of the Reich ecclesiastical authorities.

The limited triumph so far won by Dr. Mueller was possible only because Chancellor Hitler himself finally abandoned all pretense of neutrality. The dissenting pastors had been encouraged by the Leader's speech at Coblenz on August 26, in which he promised to protect religion as long as it was not used to cloak opposition to the State. Moreover, the election on August 30 of Dr. Koch, head of the opposition to the Reich Bishop, to the Universal Christian Council for Life and Work was expected to exercise a restraining influence on the German government. Thus heartened, the opposition appealed to the Chancellor to check the coercive tactics employed by Dr. Mueller and his aides. The dissidents emphasized that they were entirely willing to pledge allegiance to the Chancellor and the State, but could not accept the new church regime. On September 19, however, the Leader expressly affirmed the legality of the Reich Bishop's measures.

Fight For
Man's Life

Bristol—A young man, pale and shaken after a life-and-death struggle on a narrow ledge of rock 300 feet above a sheer drop into the Avon Gorge, told an amazing story here.

He was G. Gully, of Clifton Wood. Returning across Durdham Downs from a search for work he saw a man standing inside the railings edging the rocks above the gorge.

"He was acting strangely, but because of the position he was in I was afraid to rush towards him," said Mr. Gully.

"I moved gradually until I could get hold of his coat. He began to struggle, and I had to go inside the railings to retain my hold."

"He kept going farther towards the edge. I seized the railings, but the strain on my arm became terrific. I looked round in desperation when we were inches from the edge. I saw two motor-cyclists approaching, and shouted to them. They raced over and clambered inside the railings. But it took us ten minutes to get the man back to safety."

The man was taken away in a motor van and the matter reported to the police.

Forty Years Job
For Two Clerks

Sherbrooke Men Work Together For Government in Ottawa.

Ottawa—Forty years after they came to Ottawa from Sherbrooke, Que., as juniors in the civil service, E. J. Lemaire and H. W. Lothrop are still together—still in the same department of government. They started at salaries of \$450 a year in the civil service office. Now they run the department.

Since August, 1923, Mr. Lemaire has been clerk of the privy council. His long and distinguished services were recognized on the last birthday of His Majesty when he was honored with the award of St. Michael and St. George. Not long ago Mr. Lothrop was appointed assistant clerk.

It is believed there is no parallel in the civil service of Canada to this story of almost life-long association of boyhood companions. From grandstand seats in the political and governmental arena they have watched governments come and go—Thompson, Bowell, Tupper and Laurier, Borden, Meighen, King and Bennett.

While remaining nominally attached to the privy council, Mr. Lemaire served for many years as private secretary to Sir Wilfrid Laurier. Political changes ordained that he should be transferred to the post office department in 1917, the first real break in the association of the Sherbrooke boys. But he returned to the privy council as its clerk in 1923.

Both have achieved high place in the civil service. Some elixir of youth that seems to permeate the privy council has kept the companions young. Neither shows outward signs of age.

Due To Inherit
Million Dollars
In Secret Will

Boy Still Unaware of Legacy — Will Be Told in Six Years.

London—A twelve-year-old boy who is to inherit \$1,000,000 will not be told for at least six years.

This is the decision finally taken by Ralph Paganel Luttrell, father of the lucky boy, Arthur Brookie-hurst Luttrell.

At present Arthur is at school in Minehead, Somerset. If possible, his inheritance is to be kept a secret from him until he leaves school at the age of eighteen.

It is the estate of Viscount Novar, of Nova Scotia, a distinguished pillar of Liberalism, who died at the end of March this year.

Lord Novar left no children. His will directed that his vast estates in Scotland and his personal estate of £213,807 should be left to Lady Novar for life; and, failing issue, to the eldest son of his brother, Hector Munro-Ferguson, provided the son was born not later than December 3, 1930.

No son was born, so the residue is to go to his grand-nephew, Arthur Luttrell, when he reaches the age of twenty-five, and if Lady Novar is not then living.

Ralph Luttrell's mother was Lord Novar's sister.

Lovesick Girl
Sought Death In
Car-Wall Crash

Drove Small Auto Against Wall Because of Broken Romance.

Paris—A beautiful girl tried to kill herself by driving a car at full speed against the wall of the barracks where her lover, an officer of the Spanish regiment, is billeted near Paris.

As she was dragged, dying, from the wreckage she moaned: "I want to die, and I shall only try to kill myself again. He won't marry me."

The girl, Lisa Lambert, a 22-year-old circus acrobat, fell in love with the officer, but there were difficulties in the way of their marriage.

At the rush hour four police officers saw a small car coming towards them at a furious speed in the street where the barracks is situated.

The driver deliberately turned the car as she reached the barracks, so that it crashed against the wall at full speed, somersaulting three times.

When they raised it they found Lisa Lambert terribly injured about the face and head, and as they dragged her out, she recovered consciousness sufficiently to state the reason for her action.

Real Bargain
Basement—
In 400 B. C.

Dorchester—Who was the British forerunner of the modern multiple shop owner who ran a chain of stores near here somewhere between 500 and 400 B.C.?

His series of shops, set in a ring, has come to light during excavations at the ancient town of Maiden Castle.

The stores had real bargain basements—pits dug into the earth—and a range of goods almost equal to that of the universal providers of 1934.

Dr. Mortimer Wheeler, director of the excavations, stated that he has found the butcher's shop, containing joints of beef, pork, mutton and kid, the armourer's stores, with more than 2,000 slings, and the merchant's warehouse, with a supply of chalk weights.

Smile—Danger to religion, property and sanctity of family life from the activities of the Communists in India were emphasized

NOTICES

PHI GAMMA DELTA
Will all members of the Phi Gamma Delta fraternity enrolled in Medicine kindly communicate with G. F. Inglis at Marquette 6001 as soon as possible.

ATTENTION FRESHMEN
The usual Freshman Reception and Conversat of the Student Christian Movement will take place on Wednesday, October 3, at 3 p.m. All newcomers to the University are welcome.

PLAYERS' CLUB
The first general meeting of the McGill Players' Club will be held in the Union Ballroom on Thursday, October 4, at 5 p.m. All old members as well as newcomers who are interested are urged to come.

McGILL BAND
The first rehearsal will be held Tuesday, October 2, at 5 p.m. in the Union. All new men are urged to report on either Monday or Tuesday at 5 p.m.

CONSERVATORIUM CHORAL SOCIETY
A rehearsal of the Conservatorium Choral Society will take place tomorrow night at 8 p.m. in the Conservatorium. All members are requested to bring their music with them.

Union Rehabilitated
In Summer Months

(Continued from page 1)

Other events of interest on the program of the House Committee this year include a tea dance after the Queen's McGill football game on Saturday the 13th of October. This dance will be held in the reading room on the second floor. The usual informal dances will be held as in the past, the first being scheduled for the evening of Friday, October 19th, while there will be a second about the 11th of November and a third after the Yale-McGill hockey game just before Christmas.

New Magazines
This year the Union has subscribed to over forty periodicals of various kinds. Among the newspapers on the second floor may be found journals from Halifax, St. John, Quebec, Montreal, Ottawa, Toronto, Hamilton, London, Winnipeg, Edmonton, Regina and Vancouver. Out of town students are invited to go to the Union to read their own home newspaper. On the tables in the reading room are seen most of the leading magazines of Canada and the United States, while the illustrated papers from London, England occupy a prominent place.

The cafeteria of the Union is again functioning and is at all times ready to supply food to the hungry and coffee or tea to the thirsty. The same popular prices as last year prevail. It is expected that within the next few days the Grill Room will be opened for a coffee hour in the morning and for tea in the afternoon. It has been pointed out by the House Committee that this room, when opened, will be for the use of both men and women. A radio will be installed during the next few days and it is expected that the Grill Room will become one of the popular features of the Union.

The House Committee this year consists of Donald Small, President; Hollie E. McHugh, Vice President and John H. McDonald, Secretary. The committee is at all times open to suggestions for bettering the service rendered by the Union and any ideas may be left in writing at the Tuck Shop.

FIGHTS BULL
AND DIES

John Morton, an elderly Belfast farmer, had a fight to the death with a bull and lost. He fought it off with a stick. A woman came to his help and fainted. A boy set a dog on the bull, which ran off too late.

John Morton died of his wounds. The bull was shot.

She Fought It Out
With Her Boy-Friend

Rome—A girl fought a duel with her sweetheart in the village of Castel Baronia near Naples.

Before they confronted each other with pistols in hand on a secluded ground outside the village, they had been for a long time courting each other, and were expected shortly to become husband and wife.

But jealousy crept in, and the two quarrelled and decided to fight it out to the finish.

Now the 23-year-old Rosina Consolazio is lying wounded in hospital with a bullet wound in her right cheek.

Her lover, Filocrate Montalbetti, is in a more dangerous condition, having been shot in the head.

Thanksgiving Gift
Is Pile Of Grain

Toronto.—For the first harvest Thanksgiving service of Riverview United Church, North York, farmers of the congregation brought seven and a half tons of grain which was piled outside the church pending removal to a grain elevator, where it will be stored, the church board decided, until prices reach a satisfactory level. Then it will be sold in aid of the church fund. The harvest includes three tons of barley, the balance being composed of oats and wheat.

by Sir Henry Craik, home member of the Indian government, in a statement to the assembly.

Herbalist Defends
Diabetes Treatment

Court Hears Evidence in Incurable Case.

London.—An instrument described as a pathometer, resembling a desk fitted with wires and switches, was produced in the Cardiff coroner's court in Wales.

Henry John Trimmell, an herbalist, demonstrated its use, while giving evidence at the resumed inquest on one of his patients, George William Haken, aged twenty-three, of Severn-grove, Cardiff, whose death was alleged to have followed a change in treatment for diabetes. The funeral had been stopped by the coroner.

Mr. Trimmell said he understood that the medical profession had certified Haken as an incurable case, and added, "I told Mr. Haken that I would get in touch with a Harley-street doctor."

The coroner: Did you get in touch with one?—Yes.

Are you going to tell the jury that you got in touch with a Harley-street doctor in a trance?—By prayer and meditation.

Replying to Mr. O. Temple Morris, M.P., who appeared for the relatives of Haken, Trimmell said that when first consulted he did not say he could possibly cure the disease. "Why did you tell Mr. and Mrs. Haken that you had communicated with a Harley-street doctor?" Mr. Morris asked. "Was it to impress them?"

"No, it was more to comfort them," Trimmell replied.

Trimmell's evidence occupied nearly nine hours and the case was adjourned.

Sheffield, Eng.—One of the largest railway vehicles ever seen here, a car 93 feet long with a tare weight of 93 tons and carrying capacity of 200 tons, is being constructed here for the Soviet government.

Principal Not
Yet Selected

(Continued from page 1)

what I considered the greatest worth to them, it would be that now and hereafter they realize the dignity and value of work as a means of fulfilling the purpose of their college life and equip them for the postgraduate course of business or professional experience.

I wish the McGill Daily, its staff, subscribers and the undergraduate body as a whole the greatest possible success and pleasure in their university careers.

Graduate Appointed

It has been made known to McGill University that M. K. McPhail has been appointed a lecturer in the department of pharmacology at the University of Alberta. In the spring of 1933 he was graduated from McGill with a Ph.D. degree.

Upon completion of his studies at

At The Union

This column will be run daily and will be a bulletin board where all Union House announcements will appear.

The cafeteria is now open and doing business. Students are invited to drop in and see the improvements made during the summer months.

The pool and billiard tables are waiting to be used, while bridge and ping pong may be played at any time. Ask George on the second floor.

McGill Dr. McPhail won an 1851 Exhibition Scholarship on which he engaged in post graduate work in Europe. He is a native of British Columbia.
